

Leader in toolholder manufacturing, since 1989

Kintek, founded in 1989 in Turin, is an Italian company leader in the production and distribution of tool holders, special tools and accessories for machine tools, which has consolidated its presence on international markets thanks to its capacity of innovation and the quality of its offering. Kintek has a large portfolio of its own brand products (about 15,000 references), sold to more than 1,500 customers

worldwide, and combines its production of catalog items, manufactured according to the highest quality standards and in compliance with reference regulations, with the possibility of designing and producing special items, customized according to specific customer requests. The Group counts on 4 production plants and the contribution of about 120 employees.

Vision

Kintek aims to become a global reference point and the preferred partner for its customers, that we support in improving industrial productivity with increasingly innovative, high-performance and reliable solutions. Our action, based on the fundamental principles of uncompromising quality and excellent service, is aimed at anticipating market needs, ensuring that our customers are always one step ahead. **Ready, always.**

Mission

Our mission is to provide high-quality tools, tool holders and accessories for machine tools. We stand out for the breadth of our catalog, capable of satisfying every machining and tooling need, and for an efficient and reliable service, which ensures rapid deliveries and specialized technical support. Our pursuit of excellence drives us to improve every day and to constantly strive to expand skills, products and markets and offering a customer experience without compromise.

Quality at the heart of every Kintek product

Kintek is a guarantee of quality, sustainability and ethical approach to business.

Strict quality control

In our factories we follow rigorous quality control procedures at every stage of the process. Quality of raw material is verified and traced through certificates provided by steel makers.

Each operation carried out on the machines is started only after obtaining approval from the metrology room, which certifies perfect correspondence to drawing requirements.

During manufacturing, operators carry out process controls using certified measuring equipment and gauges, to maintain tolerances within established limits.

Upon request, we can provide the customer with quality certificates on finished products, obtained with certified 3D measuring machines.

Our commitment to the future

Beside the quality of our products, we are committed to the highest ethical and environmental standards. We firmly believe in sustainability and responsibility towards future generations, making conscious

choices to minimize our impact on the environment. Every day we improve by integrating transparency and innovation in everything we do, to create a more sustainable future.

ISO 9001 certification

Kintek achieved ISO 9001 certification, the international standard for quality management systems. This certification attests that our business processes, from design to manufacturing, comply with the most rigorous quality criteria.

ISO 9001 guarantees that:

- We constantly monitor our performance to improve efficiency.
- By respecting standardized procedures, we reduce errors and waste.
- We listen to our customers' needs to offer products and services of the highest level.
- Thanks to this certified system, we are able to offer reliable and always ready solutions, maintaining rigorous control at every stage of manufacturing and delivery.

Welfare

At Kintek, we are convinced that the well-being of our employees is a key condition to best serve our customers.

For this reason, we work daily to ensure a healthy and stimulating work environment, respecting the highest ethical principles and valuing diversity.

Continuous innovation

Our product range is regularly updated to follow industry trends, in order to meet the ever-changing needs of a constantly evolving market.

In addition, our team of engineers is always available to design customized solutions, ensuring delivery in less than 8 weeks.

A stable.. growth

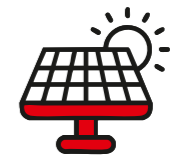

During its evolution, Kintek has established itself first on the domestic market and then consolidated its international presence. The acquisitions of Gait and Mictu have provided a great boost to growth in recent years, creating a leading Group in its sector.
